WORK EXPERIENCE

TOCOMA Limited

Full Stack Developer Intern | Dhaka

December 2023 – March 2024

● Contributed 50% of the overall service website design leveraging proficiency in React. Crafted user-friendly interfaces with a focus on intuitive navigation and aesthetically pleasing design elements. Collaborated closely with the design team to translate wireframes and mockups into functional frontend components, ensuring alignment with design principles and user experience goals.

● Contributed developing APIs for an ERP system using .NET Web API. Facilitated seamless data exchange and integration across various departments. Also responsible for designing and implementing APIs for a service website. Played a key role in documenting API specifications, system architecture, and development processes.

Ztrios Tech & Marketing

Software Developer | Dhaka

May 2024 – Current

● Spearheaded the end to end developed of a robust full stack business website leveraging technologies such as React, Next.js, Node.js, Express.js, MongoDB.

● Played of pivot role in the development of a high traffic food delivery web application focusing on the implementation of complete admin dashboard.

● Build blog websites using React, Node.js, Express.js and MongoDB.

PROJECTS

SHARED RETAIL E-COMMERCE PLATFORM   March 2024

https://github.com/nazat47/Shared-Retail-Ecommerce-platform

● Developed a Full stack multi-vendor Ecommerce web   app using React, Node.js, Express.js, and MongoDB. From implementing necessary features and functionalities like authentication, adding product, checking out, stripe payment, tracking order to admin dashboard, managing multiple shop accounts, managing orders, all the others features were added.

CHAT MATE

January 2024

https://github.com/nazat47/ChatMate

● Developed a real-time messaging app from scratch using MERN stack and socket.io with text and image

sharing. It has features including seen/delivered status, incoming message notification, typing indicator and was designed to facilitate seamless communication between users.

REAL ESTATE MARKETPLACE   November 2023

https://github.com/nazat47/Real-Estate-Marketplace

● Developed a Full stack app for a marketplace using React, Node.js, Express.js and MongoDB where
  landlords can manage their listings, users can search, view and email landlords. Implemented google authentication and
  JWT authorization mechanism, pagination and a proper search mechanism.

CONNECT VISION

January 2024

https://github.com/nazat47/Connect-Vision

● Developed a dynamic live audio and video conferencing platform utilizing the stream-io library, Next.js, typescript and Tailwind CSS. The website features seamless live video calls, group meetings, scheduled meetings, and integrated chat functionality, offering a comprehensive and user-friendly communication experience
